

Extended Community Calls (ECC)

With Extended Community Calling, Nsight Telservices customers may dial certain non-local exchanges without dialing a 1.

In the past, calls to these certain exchanges were billed at long distance rates. Now, however, the cost for these calls is 5¢ per minute.

A word of caution is in order: although most ECC calls will be dialed without dialing a 1, they are timed, and will be charged 5¢ per minute. Please make certain all members of your household or business understand the significance of making ECC calls.

Please refer to the ECC Calling Chart & Rates below. If you have any questions about the ECC calling areas, please call Nsight Telservices.

Note: You must dial the area code when making ECC calls.
